

June 9, 2015

Dear Provider,

In our continuing efforts to support evidenced-based medical care, Arizona Priority Care has approved Clinical Practice Guidelines for the following conditions:

- Coronary Artery Disease
- Congestive Heart Failure
- Chronic Obstructive Pulmonary Disease
- Diabetes

In addition to the approved Clinical Practice Guidelines, Arizona Priority Care adopted the Heritage Provider Network guidelines and Health Net Medical policies in 2014.

- 2014 Clinical Practice Guidelines & Preventative Health
- 2014 U.S. Preventative Services Task Force (USPSTF)

It is an NCQA requirement that all of our providers adhere to our Evidence-Based Clinical Practice Guidelines, so please review them at your earliest convenience.

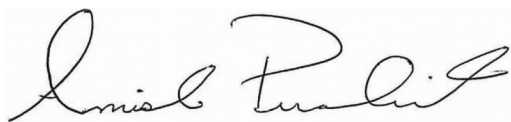

We are certain that these guidelines will help you provide **5 STAR** service to your patients. In addition, Arizona Priority Care's Quality Improvement Program is available for viewing on the AZPC website at [www.azprioritycare.com](http://www.azprioritycare.com).

- 2015 Quality Improvement Program

Again, we thank you for participating with Arizona Priority Care and we look forward to a continued long-term relationship.

If you have any questions or would like a copy of the guidelines above, please do not hesitate to contact your Network Manager at 480-499-8700.

Thank you,

Amish Purohit, MD, MHA, CPE, FACHE  
Chief Medical Officer
